Bob,

Some months ago, Stephanie Timmermeyer and I worked out some mutually agreeable language to announce and explain the new location. We can review this to make sure it is still appropriate.

Dayna, would you please share the text we developed?

Thanks,

Jeanne

Thanks much, Mike. Glad we're at the end of this process. We should be talking to Chesapeake about announcing the new site. I'll drop Paul a note but one of you should follow-up with John, if he's the right guy.

Hi Bob,

Good news! We have reached agreement on moving forward with the prospective case study in northern Oklahoma. Paul Hagemeyer said that before Tuesday, he had never been told of Chesapeake's requirement for the well control insurance they were asking us to get through the drilling subcontractor. He felt there was no possible way a water well drilling rig could cause a loss of well control, so he committed that they would drop that issue and send us confirmation in writing (which I haven't got yet, but will check on today).

Their requirement for liability insurance in the amount of \$10 million to be carried by both the prime and subcontractors for EPA is being addressed. The prime will amend their insurance certificate to name Chesapeake as an additional insured, and will require the same from the sub when they bid the drilling work. The access agreement is in final revisions with Steve Hess of OGC talking to Chesapeake's counsel, Bob Costello, today. This will add about \$20K in costs to the project, (b) (5)

Steve Hess and Bob Costello are also working on revising the access agreement to address the continuity of access to the site should Chesapeake sell the site, or be taken over by another company. Steve told me yesterday that it is 99% there, and he expects to finalize the language today or tomorrow. While this may not be absolutely binding, both sides felt it was the best that can be done under the circumstances.

Having resolved the insurance and access issues, we had a scoping meeting with our prime contractor (Ecology and Environment, or E&E) immediately following the Chesapeake meeting on Tuesday, and have already directed them to move forward with preparing the revised QAPP for characterizing the site and securing the drilling subcontractor. They also have been directed to complete the insurance certificate changes and provide that to us ASAP.

Regards,

Mike

Hi Bob,

I spoke with Jeanne this afternoon, and she asked me to send you some bullets updating you on the prospective case study with Chesapeake.

- (b) (5). Our prime contractor has the necessary insurance in place, but will have to get their policy modified to list CHK as an "additional insured" and to provide the requested subrogation language. Our prime contractor said this is not a problem and can be

done in a few weeks once we resolve to move forward.

- The request for proposals for the drilling subcontractor will have to include a spec that they get \$10 million in liability insurance. They can do that, but it will cost us \$20-25K.
- The CHK request for well control insurance is unresolved. CHK had estimated that our drilling subcontractor could purchase this insurance for \$3K + tax. Our prime contractor informed me today it is not normally sold to anyone but the well owner, and that IF we can get the sub to purchase it, it is likely to cost us \$25K. I have sent an email to John Satterfield today asking them if the well control insurance is a "must have" for them. No reply as of yet.
- Total additional cost to the project for insurance: \$45-50K
- A draft access agreement has been shared and revised several times. Last Friday afternoon I sent them the latest version, which included language that says we will require our drilling subcontractor to provide both \$10 million in liability insurance and the well control insurance, subject to approval by EPA management. (That was before the \$25K quote). (b) (5)

- [REDACTED] of continuity of access should CHK sell this property or itself be taken over by another company, Steve Hess, Susan Mravik and I had a call with John Satterfield and Bob Costello (CHK's senior counsel) on Friday afternoon. They are willing to add language to the access agreement to document the intent. (b) (5)

- You had asked me to check with our other interested company about were they still interested in participating in a prospective case study should we decide to do that. The answer is yes. (b) (5)

I will be in Ada tomorrow and will call in from there.

Subject: Fw: Meeting tomorrow.

I wanted to make sure we're ready for tomorrow's meeting with Chesapeake. Paul wants to focus on the studies that Chesapeake has conducted of the two Pennsylvania sites (Which include a retrospective case study site). I believe we previously received reports of these studies and Paul will presume some familiarity with the issues.

He will also want to know where we are in resolving the access and indemnification issues for the prospective case studies. I haven't heard anything more about the open issues and would appreciate an update before tomorrow's meeting.

If there's anyone else who should be invited to tomorrow's meeting, please work with Mary and Don to make sure they get an invite.

Thanks.

Subject: Meeting tomorrow.

Bob – wanted to get a quick read on your agenda for tomorrow's meeting.

We are currently planning to answer questions on methodology and findings from these two studies. We plan to answer questions at a fairly high level, but wanted to find out what depth you or your team might want to get into. They have had these reports for some time, so they may have questions that we can cover.

I believe that we have covered the access and contract issues, but would be happy to address that or any other issues you care to discuss.

Thank you,

Paul Hagemeyer
